It seems that the days when women and girls could walk the streets of Honolulu any time of day or night, anmolested, are past. Although our town is growing every day, it seems a pity that we can not go back fifteen or twenty years and live under some of the conditions that existed then. In these days most of the homes were at least a mile away from the schools and the pupils rode to and from on horseback, with never a fear of being spoken to by strang ers. Many of the young women and been brought up here can tell interesthave grown up to be splendid types of manhood and womanhood.

GIVE BIRTHDAY PARTY

A delightful birthday party in honor of the first anniversary of their daughter. Evelyn, was given by Mr. and Mrs. E. E. STRIPED FOULARDS

The striped foulard in combination with plain silk serge or twill maked some useful frocks that have a certain cachet of their own, though this material can never be classed among the ultra-smart, for some reason or other. One of the prettiest models imaginable for the toilette of foulard has a kimono bodice of striped blue and white foulard, the stripes being placed vertically, and this stripe continues all down the gown in front, forming a rather wide apron. Over this there is a plain, silk serge skirt that is buttoned to the striped apron with a dozen rather large pearl buttons, and two bands of the plain silk run round the corsage, the first at the waist, and the second an inch or two above the

The plain-striped sleeves are covred with dark chiffon to within some six inches of the shoulder, and have turee pairs of pearl buttons by way of ornament. There is no collarband to this toilette, but two fine lawn frills, lightly embroidered and with buttonholed edge, are laid one above the other on the shoulders, a soft silk cravat being tied loosely in front where their whiteness ends.

New kid gloves will be much more easy to put on for the first time if placed between the folds of a damp towel an hour before required. The damp stretches the kid so that the required shape is obtained without split-

An effective jabot is in net in the new rounded shape edge, with valenciennes last and with narrow center panel of hand-embroidered batiste.

"Too Many Wives," at the Liberty Theater this week, furnishes an evening of riotous fun built on a series of mix-ups in which a son and his father FOR MISS KENNEDY are the chief figures, the father objecting to his son's marriage.

The feature of the show is a "kidding stunt" that Raymond Teal pulls off with himself as the kidder and the chorus girls as the "kiddees." "Betsy Bolivar" is the catchy song being sung at the time, and Mr. Teal brings the ually and commands them to sing. The ludicrousness of the thing lies in the ludicrousness of the thing lies in the fact that most of the girls either are struck speechless or turn loose with of the Hammond Lumber Company, called back six or eight times.

No Igorrotes. There will be no Igorrotes at the 1915 Universal Exposition. The department of exhibits is in receipt of a communication from the Philippines setting forth that fact, and also stating that one of the clauses of the bill passed by the Philippine Assembly They setting aside a sum of money for its participation provides: "that no part of such funds shall be expended in exhibiting people belonging to the non-Christian tribes".

Europe Awakened. William T. Sesnon, vice president of the San Francisco Chamber of Commerce, and a member of the "Commission Extraordinary to Europe", returned to this city last Thursday and reports that the commission was gone tifty days from London, spending thirty nights on the trains, participated in thirty-nine banquets, were presented to seven kings, the Crown Prince of Sweden, Arch-Duke Joseph of Hungary, and the presidents of three republics. Scarch also states that every foreign nation visited by the commission promises to make a big exhibit at the coming 1915; WHITE MAN'S BURDEN (Indian) Universal Exposition.

Ever since April 12th the giant dredge "John McMullen" of the San Francisco Bridge Company has been pumping mud from the bay on to the site. The water has been flowing back into the bay, leaving the residue, and this is now packed very firmly. The dredge "Oakland" is also assisting in this work of filling in and it is expected that within sixty days the ground will be ready for building purposes. When the work of starting the fill was inaugurated some months ago there was an expanse of water twelve to sixteen feet in depth, and this has been forced out by the fill.
